Re: Benford UV

To whom it may concern

We had a Benford UV, Dual UV system, end of press and interdeck system, installed on our Komori LS 640+C+C in 2012.

Since the installation we have found the system easy to operate and maintain and also does exactly what it is required to do, cure UV inks.

We have never had to contact Benford UV for any service requirements in this time and I have no hesitation in recommending Benford UV to other printers.

Yours sincerely

Giancarlo Mirabelli
